1996 STATE HIGHWAY OPERATION AND PROTECTION PROGRAM

EXECUTIVE SUMMARY

JANUARY 31, 1996

The 1996 State Highway Operation and Protection Program (SHOPP) was prepared in accordance with Government Code Section 14526.5 and the strategies outlined in the Policy for Management of the SHOPP.

The SHOPP is a four-year program of projects needed to maintain the safety and operational integrity of the State highway system. It covers fiscal years 1996-97 through 1999-00. Projects include traffic safety, seismic retrofit, earthquake repair, pavement and bridge rehabilitation, and minor traffic operational improvements.

The 1996 SHOPP reflects an increase in funding and advancement of pavement rehabilitation projects as requested by the Department and approved by the California Transportation Commission during development of the 1996 Fund Estimate. The increased funding will begin to reduce the current backlog of pavement rehabilitation needs from 15,000 lane miles to 8,000 lanes miles over the next 10 years.

Projects in the 1994 SHOPP Midcycle Revision have been advanced, deferred, and deleted based on a review of the priorities, estimated costs, and estimated delivery dates for both previously programmed and new projects.

New projects are programmed according to safety, rehabilitation, and operational needs, except that a project is not programmed earlier than the year it can be delivered. All new projects have a project study report (PSR) or equivalent document identifying a project scope and estimated cost.

The 1996 SHOPP includes the following:

Programmed Projects	\$3,107 million
Reservations:	
- Phase I & II Seismic Retrofit	1,045
- Minor Projects	266
- Future Safety, Storm Damage and other Rehabilitation Projects	591
	<hr/>
Total	\$5,009 million

Programming in the 1996 SHOPP is consistent with the adopted 1996 Fund Estimate.

CALIFORNIA DEPARTMENT OF TRANSPORTATION

1996 STATE HIGHWAY OPERATION AND PROTECTION PROGRAM

The 1996 State Highway Operation and Protection Program (SHOPP) has been prepared in accordance with Government Code Section 14526.5.

PURPOSE

The purpose of the SHOPP is to preserve and protect the State highway system. Projects include traffic safety, pavement and bridge rehabilitation, seismic retrofit, earthquake and storm damage repair, minor traffic operational improvements and lands and buildings.

PROGRAM LEVELS

The 1996 Fund Estimate included \$1163 million in programming capacity for new SHOPP projects in the 1998-99 and 1999-00 fiscal years. This funding level represents a small increase over the 10-year funding plan established by the Legislature in the 1989 Transportation Blueprint legislation.

The 1996 SHOPP reflects an increase in funding and advancement of pavement rehabilitation projects as requested by the Department and approved by the California Transportation Commission during development of the 1996 Fund Estimate. The increased funding will begin to reduce the current backlog of pavement rehabilitation needs from 15,000 lane miles to 8,000 lanes miles over the next 10 years.

PROGRAMMING POLICIES AND METHODOLOGY

The 1996 SHOPP was developed in accordance with the strategies outlined in the Policy for Management of the SHOPP, a copy of which is included as Exhibit A. New projects are programmed according to safety and rehabilitation needs in the year the Department estimates that it can deliver the projects. All new projects have a project study report (PSR) or equivalent document identifying a project scope and estimated cost.

The Department conducted a comprehensive review of projects contained in the 1994 SHOPP Midcycle Revision, including all SHOPP amendments, and advanced, deferred, or deleted projects, based on statewide priorities and current estimated cost and delivery dates for both previously programmed and new projects.

1994 SHOPP MIDCYCLE REVISION PROJECTS

The 1994 SHOPP Midcycle Revision included 582 projects at an escalated cost of \$2516 million. Through January 31, 1996, an additional 95 projects at a cost of \$242 million were added to the SHOPP through the Commission's G-11 process for emergency projects or as Department approved amendments to the SHOPP.

The G-11 process was used to include 33 projects with a cost of \$117 million for Seismic Retrofit and 42 projects with a cost of \$61 million for earthquake and other emergency repairs. In addition the Department amended the 1994 SHOPP Midcycle Revision to add 20 high priority projects for \$64 million and deleted 13 projects for \$36 million to allow funding of higher priority projects or because the projects were no longer needed. A list of deleted projects is included in Exhibit G.

The 1996 SHOPP listings do not include 213 projects for \$415 million that have been awarded. The listings, however, do include 161 projects at a cost of \$1105 million that have been allocated funds or are scheduled to be allocated funds in fiscal year 1995-96, that have not been awarded. They are noted in the Program Year column of the project listings as 1996.

Cost, scope and schedule adjustments have been made based on a comprehensive review of individual projects and overall program priorities. There is a net cost decrease, excluding Seismic Retrofit and earthquake and storm damage repair projects, of \$84 million (1.6%) for projects programmed in the 1994 SHOPP Midcycle Revision.

The 1996 SHOPP Midcycle Revision includes the rescheduling of 161 projects, reflecting both changes in delivery schedules and the reevaluation of individual project priorities.

NEW PROJECTS

The 1996 SHOPP includes 220 new projects at a total cost of \$766 million. These projects were funded from new funds provided in the 1996 Fund Estimate for fiscal years 1998/99 and 1999/00, reservations in the 1994 SHOPP Midcycle Revision, project savings, and deletion of lower priority projects or projects that are no longer needed. New projects include:

Traffic Safety - 18 projects for \$21 million

Roadway Rehabilitation - 128 projects for \$586 million

Bridge Replacement or Rehabilitation - 30 projects for \$69 million

Earthquake and Storm Damage - 5 projects for \$9 million

Plantings, Rest Areas and Minor Operational Improvements - 38 projects for \$77 million

Lands and Buildings - 1 project for \$4 million

FUND RESERVATIONS

The 1996 SHOPP includes fund reservations of \$1902 million over the four years of the SHOPP. The Safety, Rehabilitation and Other reservation provides for the advancement of \$175 million of pavement rehabilitation projects approved by the Commission during adoption of the 1996 Fund Estimate. These reservations are shown in Exhibit B.

LONG LEAD TIME PROJECTS

The Department has identified future SHOPP projects that involve a complex environmental process and require more than four years lead time for delivery of the construction contract documents. These projects are shown in Exhibit F.

Long lead time projects are required to have a completed PSR or equivalent scoping document and justification that the environmental process must be started prior to programming. Work will be limited to completion of the environmental process.

GEOGRAPHIC DISTRIBUTION

The Department's selection of projects for inclusion in the SHOPP is based on safety, rehabilitation and operational needs rather than on geographic distribution. Per Chapter 373, Statutes of 1993, SHOPP projects no longer count toward meeting the north/south split and county minimum requirements of Sections 188 and 188.8 of the Streets and Highways Code.

RESPONSE TO REGIONAL TRANSPORTATION AGENCY COMMENTS

A draft of the 1996 SHOPP was sent to all regional agencies on November 20, 1995, for review and comment. A copy of responses from regional agencies requesting changes in the SHOPP are included in Exhibit E. The following are responses to the comments received:

Contra Costa Transportation Authority

The Contra Costa Transportation Authority requested that two highway plant restoration projects which had been delayed to fiscal year 1998-99 be advanced to fiscal year 1996-97. The project on Route 80 from Appian Way to Pinole Valley Road has been advanced to fiscal year 1996-97. The project on Route 80 from Pinole Valley Road to California Street cannot be delivered in 1996-97 because of ongoing construction in the same area. The Contra Costa Transportation Authority has agreed to programming the project in fiscal year 1997-98. This project has been advanced to fiscal year 1997-98.

City of Porterville

The City of Porterville requested that the Department coordinate design of a SHOPP project to widen the Tule River Bridges with a local project to develop the Tule River Parkway. The Department will coordinate design of the Tule River bridges with the City of Porterville.

The city also requested that the Department consider widening the bridges at Henderson Avenue and Route 65 if the bridges are the same width as the bridges at Olive Avenue and Route 65. The bridges at Olive Avenue and Route 65 are being widening as part of a currently programmed SHOPP pavement rehabilitation project. The bridges at Olive Avenue are only 28 feet wide and are required to be widened to 39 feet to meet federal standards. The bridges at Henderson Avenue are 39 feet wide and already meet federal standards.

PROJECT LISTING

Project included in the 1996 SHOPP are shown in Exhibit H. Projects are grouped into the following seven program categories for each county:

- Traffic Safety
- Roadway Rehabilitation
- Bridge Replacement or Rehabilitation
- Seismic Retrofit
- Earthquake and Storm Damage
- Planting, Rest Areas and Minor Improvements
- Lands and Buildings

County maps showing the location of each project will be included in the final 1996 SHOPP approved by the CTC. A technical listing is also available from the Department upon request.

DESCRIPTION OF EXHIBITS

Exhibit A **POLICY FOR MANAGEMENT OF THE SHOPP**

Department's Policy for Management of the SHOPP as presented to the California Transportation Commission in October 1990.

Exhibit B **1996 SHOPP FUND RESERVATION SUMMARY**

Lists 1996 SHOPP fund reservations by fiscal year.

<u>Exhibit C</u>	1996 SHOPP PROJECT SUMMARY Lists number and dollars of previous and new projects in each county.
<u>Exhibit D</u>	1996 SHOPP PROGRAM SUMMARY Lists dollars programmed in each county by program category.
<u>Exhibit E</u>	1996 SHOPP COUNTY COMMENTS Copy of county comments on 1996 SHOPP.
<u>Exhibit F</u>	LONG LEAD TIME PROJECTS List of projects requiring environmental work prior to programming.
<u>Exhibit G</u>	DELETED PROJECTS Projects no longer needed or deferred to fund higher priority projects.
<u>Exhibit H</u>	COUNTY PROJECT LISTINGS Listings of individual projects sorted by county and program. The listing for each project indicates the programmed amount for right of way and construction from the State Highway Account and any local contribution.

January 31, 1996

California Department of Transportation

Policy for Management of the
State Highway Operation and Protection Program (SHOPP)

1. Seismic retrofit projects. Every identified seismic retrofit project will be programmed in the year in which the Department estimates that it can be delivered. Every seismic retrofit project will be proposed for the allocation of funds when it is delivered, even if that is earlier than the year programmed. The SHOPP may include unprogrammed reservations to meet anticipated needs for seismic retrofit projects not yet identified.
2. Traffic safety projects. Every identified traffic safety project will be programmed in the year in which the Department estimates that it can be delivered. Every traffic safety project will be proposed for the allocation of funds when it is delivered, even if that is earlier than the year programmed. The SHOPP may include unprogrammed reservations to meet anticipated needs for traffic safety projects not yet identified. This strategy applies only to those projects meeting the Department's specific criteria for traffic safety projects (i.e., safety index greater than 200, or equivalent).
3. Other SHOPP projects. All SHOPP projects other than seismic retrofit or traffic safety projects will be programmed according to rehabilitation need and other program priorities, except that a project will not be programmed earlier than the year in which the Department estimates that it can be delivered.
4. Level of funding. All SHOPP programming will be limited to the amount included in the most recently adopted fund estimate. Whenever the Department identifies a project cost increase or a new project to add to the SHOPP, it will identify the source of funding for the increase or new project, whether from an unprogrammed SHOPP reservation or from the deletion or decrease in cost of another project or projects.
5. Project cost and scoping. No project will be included in the SHOPP unless the Department has a completed project study report (PSR), project study and scoping report (PSSR), or equivalent document identifying a specific project scope and its estimated cost and delivery schedule.
6. Review of project programming. The Department will develop its biennial proposed SHOPP in accordance with these strategies. In addition, the Department will conduct a comprehensive review of the SHOPP in accordance with these strategies at least once between adopted SHOPP's. This means that the Department may propose to advance, slip, or delete projects included in the prior SHOPP, based on a review of the priorities, estimated costs, and estimated delivery dates of both old projects and new candidate projects.

The objectives of this strategy are:

- o to assure that the SHOPP, consistent with the STIP, reflects a specific project delivery plan and commitment;
- o to provide goals and incentives for the identification of effective SHOPP projects and for the management of SHOPP project costs and schedules;
- o to assure that State resources used for the operation and protection of the State highway system are focussed on the highest priority needs; and
- o to assure that the SHOPP (at least with regard to projects outside the seismic retrofit program) is developed and delivered in a way that has no adverse effect on the development or delivery of the STIP or any STIP project.
